

EU CPNP registration of Metsä Tissue Katrin liquid consumables.

The Cosmetic Products Notification Portal (CPNP) is the online notification system created for the implementation of Regulation (EC) No 1223/2009 of the European Parliament and of the Council on cosmetic products.

This Regulation requires that the responsible persons and, under certain circumstances, the distributors of cosmetic products submit through the CPNP some information about the products they place or make available on the European market.

The CPNP is making this information available electronically to the Competent Authorities (for the purposes of market surveillance, market analysis, evaluation and consumer information) and to the Poison Centres or similar bodies established by Member States (for the purposes of medical treatment).

The CPNP is accessible as from 11 January 2012 to Competent Authorities, European Poison Centres and cosmetic products responsible persons and will become accessible to cosmetic products distributors as from 11 July 2013.

In order to guarantee constant product quality and safety to our customers we have of course registered all of our Katrin consumables that are covered by the EU-Cosmetic directive 1229/2009 with the CPNP.

The attached overview is a print-out from the EU CPNP register.

Note: There is no such thing as a certificate – it is simply a listing.

Please keep in mind that all other products (those that are not listed) are not regarded “cosmetics” according to EU directive 1229/2009 e.g. the disinfecting consumables. Disinfectants are due to be registered as disinfectants according to EU-Biocide directive 528/2012 – but that is not required before 2015.
